

SURVEY: HOW EDUCATIONAL PROCESSES EFFECT JEWISH AND ARAB TEENAGERS IN THE LIGHT OF THE MAY 2021 VIOLENT EVENTS

At times of rising tension and violence, one can expect remoteness and radicalization between Jews and Arabs; Each group tend to become more introverted, feelings such as hatred, anger and fear arise while care, concern and warmth are pushed aside. This introversion is especially prominent among those who are not familiar with the other side, Jews and Arabs alike.

During the recent events of May 2021, 'A New Way' performed a survey among Jewish and Arab 8th & 9th graders, some of which are participating in the A New Way's program, while their peers are not taking part in such program.

The goal was to inspect – in the light of the May 2021 violent events – whether there are any differences in feelings, perceptions and opinions of teenagers who took part in the shared society educational program, comparing with those who did not.

Findings were unambiguous, stressing out the direct and clear impact of multi-cultural educational processes, within school;

Program participants show higher emotional strength

Program participants are

14% more willing to share their own story

28% more willing to collaborate

Program participants show higher willingness for a multi-cultural encounter

THE SURVEY RESULTS, FOLLOWING THE VIOLENT EVENTS, INSTILL HOPE AND DEMONSTRATE UNDOUBTEDLY THAT INDEED A NEW WAY IS POSSIBLE!

By investing and developing the right and broad educational processes among Israeli Jewish and Arab students, we can tone down the negative feelings and promote a true, open and sincere partnership.

Our thanks extended to Rana Abbas, PhD for managing and analyzing the survey and its results.
